

WORK RESTRICTIONS? NO PROBLEM.

- ▶ **67% of users requested the Altwork station due to an injury:** when asked what body part were affected, these same respondents noted Back/Neck as their primary issue.
- ▶ **2.4X increase in workable hours:** noted by users who reported to being unable to work a full 8 hour day prior to getting their Altwork Station. Documenting hours they could work (sitting or standing) before their Altwork station, and how many hours they could work with their Altwork. Some users even reported the ability to reduce their pain medications while using Altwork.
- ▶ **Better than a Sit/Stand Desk:** This increase was achieved even with the majority of users (67%) previously using a sit/stand station.
- ▶ When asked how they are using their Altwork, **67% of users preferred the reclined (with leg rest) or fully reclined positions**

THE ALTWORK STATION: Kinematics + Biomechanics = The Most Advanced & Effective Workstation on the Market Today

-  Only fully motorized solution with a full range of motion, from standing desk to zero gravity
-  Issued patents for headrest and actuation movements that create the most fluid & comfortable workstation on the market
-  Magnetized desktop for comfortable and secure computing at all angles of recline
-  Medical grade ergonomics that eliminate doctor restrictions and pain med requirements
-  Ultra premium fit & finishes and custom upholstery to match any home/work decor
-  Frictionless setup, with a single plug, caster wheels and a compact 18 square foot base

“
I will dream of this
reclining work station
for the rest of my days

The Verge

Patented four-bar linkage and one-way devices minimize number of actuators required

Patented gas-sprung footrest hinge and cabling system

Patented cam-driven linkages allowing for only one actuator to control backrest, headrest, seat pan, monitor and desk motions

Multi-disc clutch locking monitor arm with locking gas spring height adjustment

Multi-disc clutch ratcheting desk arm for infinite adjustment and safety
