Use your smartphone or tablet
without touching the screen

Mouse4all is an assistive product that allows everyone to use an Android tablet or smartphone entirely: *WhatsApp, Facebook, YouTube*, Internet, social networks, games or any other app.

It improves the quality of life of the persons who use it, increasing their **autonomy, privacy** and **personal development**. It allows being connected with family and friends, anytime, anywhere.

Suited for persons with a **severe physical disability** resulting from cerebral palsy, spinal cord injury, multiple sclerosis, ALS, neuromuscular disease.

Mouse4all is composed of an Android app
and a connection box.

- It's really easy to install. You can use it with **one or two switches**, a **trackball** or a **joystick**.
- Big pointer as a visual aid.
- Customizable to each person.

- Point scanning with one or two switches (standard 3.5 mm plug).
- Trackball or joystick control, compatible with most USB input devices on the market.
- No batteries required.
