-  *Height-Adjustable Backrest*
-  *Adjustable Seat Depth*
-  *Adjustable Headrest Angle*
-  *4-Dimensional Arms*
-  *Advance Tensile Recovery Fabric*

Advanced Tensile Recovery Fabric

Drawing its inspiration from modern material designs and ancient buttressing principles, ATR is a woven multi-layered nylon that is both responsive and supportive. Comparing to traditional fabrics, it has more give and spring and as a result it provides an enhancing layer to the X3's already remarkable underlying molded seating support surface.

X³-MGMT X3 incorporates most of the same design and features as X2 but replaces the X2's K-Sport material with the latest advancement in fabric technology, Advanced Tensile Recovery Fabric (ATR), a high resiliency molded foam seat (memory foam optional) and a full polished aluminum frame. In addition, ATR is water, spill and stain resistant, meaning your chair will continue to look good as new for years to come. When you feel the ATR difference you will wonder how you ever were satisfied with traditional fabric.

“

The chair is fantastic, has really increased my productivity and looks great. Nate in customer service took a picture of my home office & recommended the style / finish to match my interior along with my work schedule. All around very impressed and 100% worth it if you're a working professional looking to work harder and yet be more relaxed.

Sam, ★★★★★
